PhD of mathematics, University of Łódź, Poland, 1996
Master of Science Degree in mathematics, Pedagogical University of Bydgoszcz, Poland, 1991

Profile

During my career I acquired a wide and deep knowledge of business processes, particularly in chemistry sector, utilities sector (power generation), University and Administration. Since 1998 I have been engaged in implementation of ERP systems. I took part in numerous projects taking a leading role in process of overseeing implementation of system. From the client side I was responsible for high value budgets of time limited projects. My main responsibility was to obtain the project objectives that board of directors has defined, often being personally involved in defining them.

My current activity focuses on creating SAP team in one of the highly growing IT Company in Poland and built the business consulting competence.
